IT SUPPORT ENGINEER | SYSTEMS & NETWORKS

www.linkedin.com/in/loay-alesawi

JORDANIAN NATIONAL | TRANSFERABLE IQAMA | VALID DRIVING LICENSE (KSA)

IT Support Engineer with hands-on experience in system operations, networking, and cybersecurity fundamentals. Skilled in troubleshooting hardware, software, and network issues, managing user access, and supporting Windows and Linux environments. Experienced in DHCP, VLANs, firewall monitoring, and network analysis tools such as Wireshark. Passionate about optimizing system performance and strengthening IT infrastructure.

WORK EXPERIENCE

Cybersecurity & Data Analysis – Virtual Experience

STC & Misk Foundation

2026

- Analyzed cybersecurity incidents and identified Indicators of Compromise (IOCs)
- Investigated system logs and detected suspicious activities
- Applied incident response procedures and documented findings
- Analyzed user behavior data to identify trends and patterns
- Built forecasting and recommendation models to support data-driven decision-making
- Generated insights to improve user experience, engagement, and content recommendations

IT Support & Systems Operations

Namaa Charity

2025

- Provided technical support for hardware, software, network, printers, scanners, and user access issues
- Installed, configured, and maintained PCs, laptops, peripherals, and biometric attendance devices
- Managed user accounts, permissions, email accounts, and access control using Odoo
- Configured DHCP services, IP settings, reservations, and basic network connectivity
- Assisted in VLAN segmentation, router/switch configuration, and branch connectivity troubleshooting
- Monitored servers, performed basic backup operations, and ensured system availability
- Monitored firewall logs and supported access control policy improvements using FortiGate/Cyberoam
- Analyzed network traffic using Wireshark and documented technical issues and solutions

Secure Web-Based Application (Final Year Project)

Arab Open University

2024

- Designed and developed a secure bilingual (Arabic/English) web-based volunteer management system
- Implemented role-based access control (RBAC) to enforce secure user authorization
- Developed authentication mechanisms using password hashing and session management
- Built RESTful APIs using Express.js and PostgreSQL for scalable backend operations
- Applied cybersecurity best practices to ensure system security, data integrity, and access control

RELEVANT SKILLS

- IT Support & Technical Troubleshooting
- Network Configuration & Troubleshooting (TCP/IP, DNS, DHCP)
- Windows & Linux System Administration
- Firewall Configuration (FortiGate Basics)
- Cybersecurity Fundamentals
- User Access & Identity Management

EDUCATIONAL HISTORY

**Bachelor of Information Technology
(Networks & Security)**
Arab Open University (AOU) - Saudi Arabia

CERTIFICATIONS

- CCNA - Cisco Networking Academy
- CompTIA Security+ (SY0-701)
- HCIA-Cloud Computing - Huawei ICT Academy
- HCIA-IoT V3.0 - Huawei ICT Academy
- FortiGate Firewall Administration
- Ethical Hacking - Cisco Networking Academy
- Linux System Engineer - Huawei Talent
- Cloud O&M Engineer - Huawei Talent
- Wireless Network Analysis & Attack Detection
