PROFESSIONAL SUMMARY

IT Specialist with hands-on experience in IT support, network operations, cybersecurity fundamentals, and ERP system administration. Skilled in troubleshooting hardware, software, and network issues, supporting Odoo ERP users, monitoring firewalls, configuring DHCP and VLANs, and analyzing network traffic using Wireshark. Strong background in supporting daily IT operations, improving system availability, and delivering reliable technical solutions across business environments.

WORK EXPERIENCE

Data Analyst 2026
STC

- Analyzed user behavior datasets and extracted operational insights to support decision-making.
- Built predictive models to forecast customer behavior using statistical analysis tools.
- Prepared reports and presentations to communicate analysis results and recommendations through Data Storytelling.

IT Specialist 2025
Namaa Charity

- Provided IT support and network administration for users, devices, and branch connectivity, including hardware maintenance, user support, and Odoo ERP access control.
- Configured DHCP services, IP settings, and VLAN segmentation to troubleshoot and resolve connectivity issues across multiple branches.
- Monitored servers, firewalls (FortiGate/Cyberoam), and backup operations to support system availability and operational continuity.
- Conducted on-site branch visits to troubleshoot MikroTik routers and restore network connectivity.
- Utilized Wireshark for network traffic analysis and troubleshooting connectivity and security-related issues.

Full-Stack Developer (Capstone Project - VolunteerLink) 2024
Arab Open University

- Designed and developed VolunteerLink, a secure and bilingual (Arabic/English) web platform.
- Secured system access by implementing Role-Based Access Control (RBAC), password hashing, and session management.
- Applied web security best practices to ensure data integrity, system availability, and secure API integrations.

RELEVANT SKILLS

Networking & Security:

Network Infrastructure: Routing, Switching, TCP/IP, DNS, DHCP, VLANs, MikroTik RouterOS. — Network Security: Firewall Administration (FortiGate, Cyberoam), Wireshark. — Security & Access Control: Cybersecurity Fundamentals, RBAC, IAM (Identity & Access Management).

Systems & IT Operations:

System Administration: Windows & Linux Systems, Active Directory. — Enterprise Systems: Odoo ERP Administration & User Access Control. — IT Operations: System Backups, Hardware/Software Troubleshooting. — Network Monitoring: PRTG Network Monitor.

Data & Software Development:

Data Analytics: Data Analysis, Power BI, Excel Dashboards. — Web Development: Node.js, Express.js, PostgreSQL, REST APIs.
